Hamilton Southeastern Junior High

Echoes for Athletes Program

Eligibility:
Student Athletes enrolled within the Hamilton Southeastern School district ages 13 to 18 are welcome to participate. Those under 18 must be accompanied by a parent or guardian.

What is the cost?
The screenings are $25 per student payable by cash or check at the time of registration. Please make checks payable to IU Health.

Why Student Athletes should be screened:
This type of cardiovascular screening is designed to detect structural abnormalities like Hypertrophic Obstructive Cardiomyopathy, Aortic Stenosis, Marfan’s Syndrome, and Mitral Valve Prolapse. Although rare, some of these issues can be potentially fatal. Detailed information can be found about these conditions can be found at IUHealth/Saxony.org. If studies taken at these events reveal possible abnormalities, we endorse a complete cardiovascular examination and follow-up with your personal physician. Please understand that this screening should not be used in lieu of cardiac tests if ordered by a physician.

What is involved?
This is a non-invasive procedure utilizing ultrasound to capture digital photos and measurements of the heart. The entire process should take less than 20 minutes. We do recommend that girls wear sport bras and advocate for parental presence in the exam room.

When:
Thursday, April 23rd, 2015
5:00-8:00pm (appts. every 15 minutes)

Where:
Hamilton Southeastern Junior High School
12278 N. Cyntheanne Road, Fishers, IN 46037
